DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: It appears that Figure 1 of the disclosed invention is an exploded view; however, the description of the Figure 1 does not indicate an exploded view.

Appropriate correction is required.

Claims 1 and 8 are objected to because of the following informalities: In claim 1, line 2, after the word "member" the phrase -- having an -- should be inserted. In claim 8, the phrase "one of more" should read -- one or more --. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6, 7 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation followed by linking terms (e.g., preferably, maybe, for instance, especially, can be) and a narrow range or limitation within the broad range or limitation is considered indefinite since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired.

Allowable Subject Matter

Claims 1-5 and 8 are allowed.

Claims 6, 7 and 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bednar et al teaches a toy rocket. Richter teaches launching devices. Ryan teaches multiple-stage projectile. Wolfe teaches compressed air rocket propelling device. Filipeli teaches a rocket toy. Olson, Jr. teaches a jet launch toy.
